SKILLS

Languages :- Python, Java Script, C, C++, SQL

Tools and Frameworks :- ReactJS, Django, NodeJS, Express, MongoDB, Firebase, Git/GitHub

WORK EXPERIENCE

Organizer, Google Developer Groups (GDG) on Campus

Aug 2025 - Present

Leadership and Team Collaboration

Led and collaborated with peers to establish the GDG on Campus chapter, fostering a vibrant developer community within the college.

Event Planning and Execution

Organized and managed technical events, workshops, and study jams focused on Google technologies, helping students enhance their practical skills.

Community Engagement

Built strong connections among developers, promoting networking, knowledge sharing, and active participation in global Google Developer initiatives.

Technical Advocacy

Promoted the use of Google Cloud, Flutter, and Generative AI through awareness sessions and hands-on workshops.

Front-End Intern, Vaishnav Technologies

Oct 2024 - Nov 2024

Project Adaptability

Demonstrated flexibility in adapting to various project requirements and deadlines, delivering reliable results under tight timelines.

Front-End Styling and Functionality

Applied styling frameworks and custom scripts to enhance UI aesthetics and usability, creating a visually cohesive experience.

Front-End Scripting and Animation

Developed interactive features and animations to enhance user engagement, utilizing JavaScript libraries for smoother functionality.

Skill Building

Strengthened skills in web technologies and gained hands-on experience in real-world applications of frontend development.

Code Refinement

Conducted code reviews and optimization to reduce load times, ensuring the front-end performs efficiently and reliably.

PROJECTS

CrowdShield

Developed a real-time crowd monitoring and safety system using AI-driven computer vision to detect crowd density, identify risks, and trigger alerts during emergencies. Designed to enhance public safety in high-density areas such as events, stations, and gatherings.

Skills Used: Python, OpenCV, Django, Firebase, Computer Vision, Real-Time Monitoring

AI Legal Assistant

Built an AI-powered assistant capable of analyzing legal queries, retrieving relevant laws, and providing structured legal guidance. Integrated with CrewAI and NLP models to simplify access to legal knowledge and assist individuals without prior legal expertise.

Skills Used: Python, CrewAI, Generative AI, LangChain, Legal Tech Solutions

EDUCATION

2024 - present	B-Tech at Sandip Foundation, Nashik	(GPA: 8.01)
2024 - 2028	Bachelor's Degree at IIT Madras	

CERTIFICATIONS

Oracle (Aug 2025 – Aug 2027). “Oracle Cloud AI Foundations Associate”.

Udemy (Aug 2025). “Python Bootcamp From Zero to Expert”.

Simplilearn (Jul 2025). “Machine Learning Using Python”.
